SECURITY INFORMATION

Daily Progress Report, Monday, 12 November 1951 - BGFIEND

The third W/T wireless contact was made with the Pine Team on Thursday, 8 November. The team flashed an "all well" signal and reported that they were in wet snow. They said that they had met the enemy and that one of their group, Mater Jebege, had been captured. There is no indication from fiend records that this man is a member of the team. It is probable that he was a team follower. The message said that the supply drop of October 15 had landed too far away to be retrieved and that they were awaiting the next drop. The [] [] (noted that they were postponing the drop scheduled for 12 November until a list of specific items needed was received from the team.
